

Job Description

Position Name	Audio Visual Installer
Position Category	Junior Technician
Employer Name	Smart-Fi Audio Visual CC
Employer CC Number	2009 / 032190 / 23
Date of Issue	2019-11-01

Job purpose:

You will install Audio Visual systems in our client locations. You will be responsible for performing on-site and in-shop installation work on all Audio Visual, Surround Sound, DSTV, wireless audio, Home cinema, Home automation, boardroom, CCTV and/or IT networks. You will install customers' orders on time with precision and care, ensuring that Smart-Fi AV's customers receive the highest quality product and service expected of us. Our installers are the best at what they do.

Key areas of responsibility:

- Perform on-site and in-shop installation work, ensuring all AV systems are installed efficiently, on-time, as per installation drawings, delivering a service that exceeds customers' expectations
- Responsible for job site inventory, the security, transportation, and storage of project materials.
- Responsible for ensuring that delivery notes accurately reflect equipment delivered, signed for by customers, and returned to the office.
- checking orders against paperwork prior to departure from the workshop
- calling clients and making arrangements prior to departure from the workshop
- loading jobs into vehicles and carrying equipment into customers' homes with care
- maintaining the cleanliness and tidiness of vehicles and the workshop to ensure all staff continue to work in a safe and pleasant environment
-

The role requires:

- technical knowledge and experience on all Audio-Visual installations /DSTV / IT networking / Home theatre/ Home Automation / Fault Finding / VC installs and Lighting Automation
- the ability to work collaboratively as part of the growing installation team
- the technician must have a good understanding of the acoustic and viewing challenges for each space in which AV equipment will be used
- the use of power, compressed air and hand tools in a safe manner
- Clean, maintain, and update equipment, including software and batteries.
- basic computer-literacy and basic understanding of Wi-Fi network setup
- a clean South-African driving license

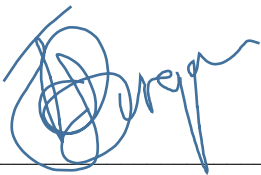

The person will be:

- careful and diligent – even meticulous – with a good dose of common sense
- demanding of high standards and at ease with demanding people
- good humoured and trustworthy
- at home in the worlds of audio, video, home theatre and general construction thereof
- informal but 100% professional while respecting traditional courtesy and good manners

Requirements:

- Matric Certificate with good results in Maths and Science
- Excellent communication skills – written and verbal
- Working knowledge of Audio Video systems design, operation and installation
- Formal training in cable installation and termination (high wish)
- Minimum two year experience in one or more related segments, including AV installation, cable pulling, field terminations, system commissioning, DSP configuration, and programming
- Careful and analytical problem-solving skills in all situations
- Ability to work at heights and in confined spaces.
- Experience in manual labour, related to site preparation and/or equipment setup

Job description is subject to change.
